EHB-CB: Generating EHB Containers from .arxml files only

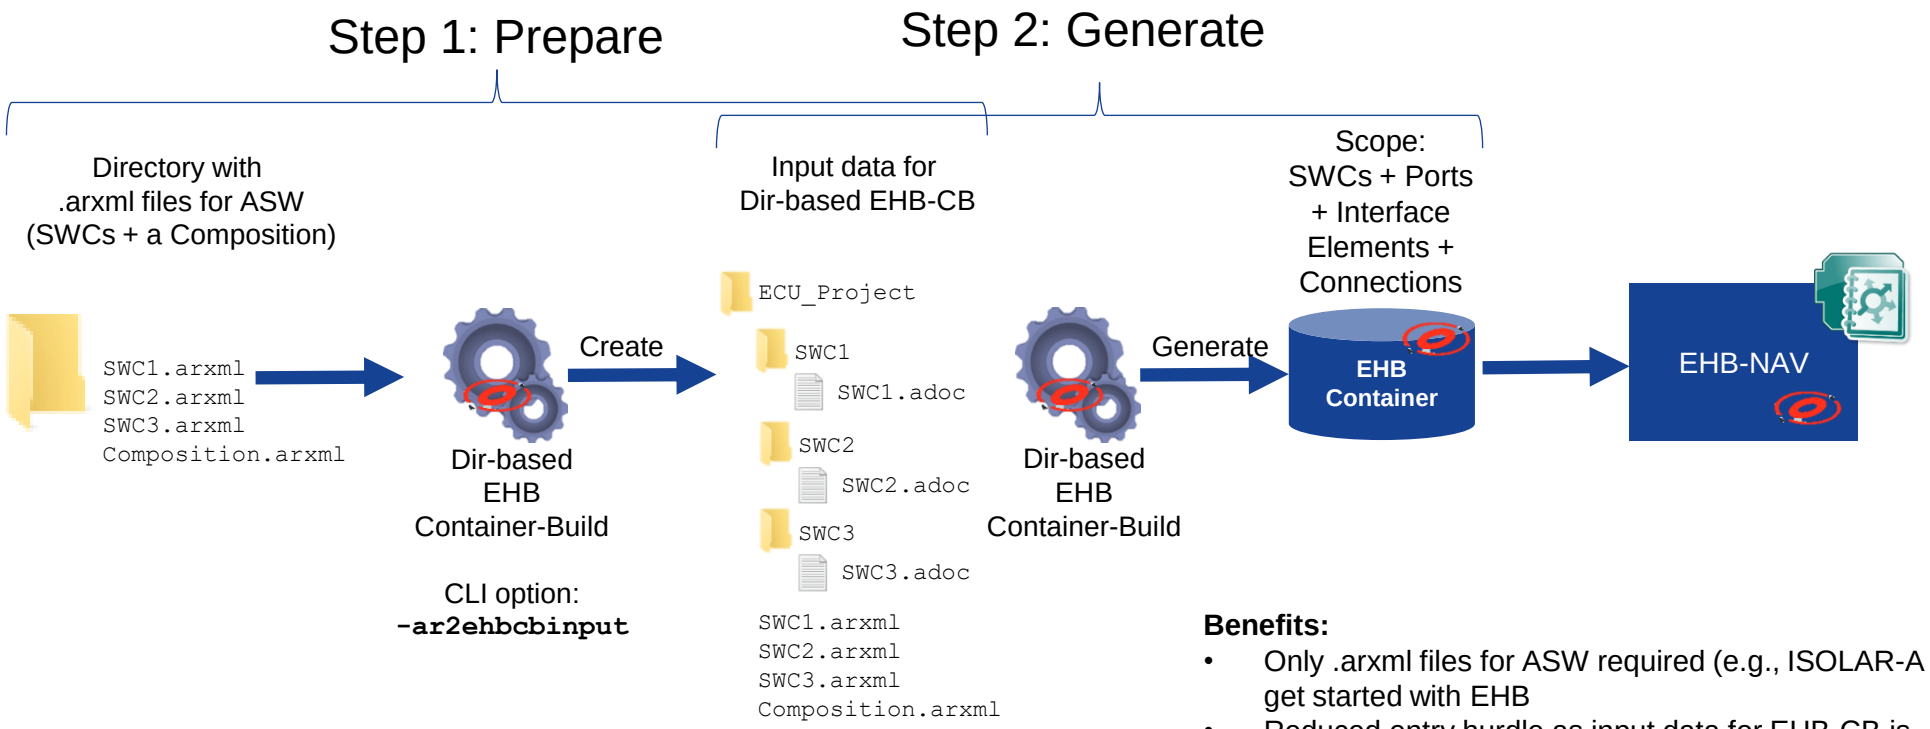
Demo EHB-CB



Benefits:

- Only .arxml files for ASW required (e.g., ISOLAR-A project) to get started with EHB
- Reduced entry hurdle as input data for EHB-CB is automatically generated
  - Learn how EHB-CB works
- 2 step approach such that auto-generated input data can be altered (e.g., additional ASCET / SL models or C-Code)

ETAS EHANDBOOK

EHB-NAV: Features related to AUTOSAR (Classic) support

Demo
EHB-NAV

Benefits:

1. Quickly find information about SWCs (e.g., ports, interface elements) and A2L labels
2. Understand dependencies between SWCs though overview diagrams
3. Create INCA experiments with few clicks
4. „See“ live running values from INCA in AUTOSAR architecture visualization
5. Utilize EHB + MDA 8 finding calibration issues
